EDUCATION

Computer Systems Technician - Network Systems • Mohawk College
Network Engineering and Security Analyst • Mohawk College
Bachelor of Sports Business Management • Honours • Brock University

TECHNICAL SKILLS

PowerShell • Python • Bash • Git • GitHub • CI/CD • SQL • Microsoft 365 (Exchange Online, Teams, SharePoint, OneDrive) • Hybrid Exchange • Entra ID / Azure AD • Active Directory • Group Policy • SCCM • Intune • Patch My PC • Windows Server • Linux • CrowdStrike • Wireshark • Code Review • Workflow Design • AI Tooling (Copilot Studio, local AI models)

PROFESSIONAL EXPERIENCE

St Joseph's Hospital • Hamilton, ON • 2023 - Present
Project Analyst – Information Systems (Digital Solutions)

- Support Microsoft 365, identity, endpoint, and access issues using PowerShell, logs, admin centers, and documentation to maintain reliable enterprise operations.
- Built a PowerShell-based learner onboarding workflow that validates CSV intake, matches or creates Active Directory accounts, plans group and mailbox access, generates ServiceNow handoffs, and supports high-volume daily onboarding after retirement of the previous AD Manager workflow.
- Administer and automate a hybrid Exchange environment supporting nearly 10,000 mailboxes, including PowerShell tooling for staged Microsoft 365 migrations, shared-mailbox readiness, licensing checks, public-folder retirement, and mailbox recovery.
- Built a scheduled PowerShell password-remediation workflow for Cybersecurity for compliance purposes that processes monthly weak-password reports, rechecks Active Directory weekly, sends staged reminders, flags unresolved accounts for password change at next logon, and retains logs and archived evidence.
- Troubleshoot Microsoft Entra ID / Azure AD issues involving sync failures, identity-related problems, licensing issues, and attribute updates in a hybrid environment.
- Designed a PowerShell workflow for Windows 11 hardware refreshes that captured installed applications, printers, local groups, and device state; guided restoration on replacement devices; and prepared Active Directory group and OU changes.
- Coordinated Windows 11 replacements across hundreds of endpoints, directing third-party technicians, scheduling department rollouts, tracking daily completion, and resolving deployment issues with internal teams and vendors.
- Built PowerShell tools for a 1,000+ user Workday rollout, validating inconsistent source data; matching, creating, or re-enabling Active Directory accounts; populating required attributes and groups; planning mailbox licensing; and generating recurring CSV reports for go-live tracking.
- Support endpoint management and deployment activities through SCCM and Intune, including device targeting, software updates, automatic deployment rules, update rings, driver approvals, policy assignment, and group-based deployment workflows.
- Created a reusable code review framework covering script purpose, operational risk, recommended changes, testing limits, and deployment notes, giving technical teams practical feedback they could apply to future automation.
- Serve as a departmental code reviewer for PowerShell automation across networking, cybersecurity, and software teams, testing scripts and improving input validation, error handling, logging, timeouts, and run instructions before release.

BEN THOMPSON

E: benthompsonbusiness@gmail.com P: 289-668-0005 A: Cambridge, ON

Dejero Labs • Waterloo, ON • 08/2022 – 2023 **Information Technology Specialist**

- Supported Microsoft Exchange Admin Center, Google Admin Console, software licensing, and end-user troubleshooting across a mixed corporate environment.
- Deployed CrowdStrike endpoint security software through scripted rollout workflows and monitored logs for security and vulnerability follow-up.
- Imaged and supported Windows, Linux, and macOS devices and resolved network, printer, print server, cabling, switch/router, and phone-system issues.

Linamar Corporate Office • Guelph, ON • 03/2022 - 08/2022 **Corporate Desktop Support Technician**

- Managed Active Directory users and groups, supported VPN and network issues, and resolved hardware, software, and endpoint problems for corporate employees.
- Created technical training and troubleshooting documentation for corporate IT staff.
- Recovered user data from cloud backups and documented repeatable recovery steps.

Mohawk College • Hamilton, ON • 2021 – 2022 **PASS Leader - Programming Fundamentals (Python)**

- Taught Python fundamentals through weekly seminars, live sessions, documentation, and GitHub learning material for students with no prior programming experience
- Created educational material and documentation for students and set up educational GitHub learning programs for students with no prior programming experience.
- Won PASS Leader of the Month due to positive feedback and high participation.

Renewed Computer Technologies (RCT) • St. Catharines, ON • 2019 – 2020 **Computer Technician & Lead Inventory Specialist**

- Built, repaired, and refurbished computers and electronics for families and schools.
- Troubleshoot Windows performance and operating system issues and applied security procedures when handling sensitive customer data.
- Configured and installed hardware, software, and operating systems.

CURRENT PROJECTS & CONTINUOUS LEARNING

- Maintain a personal Linux home lab for system administration, DNS filtering, local AI services, self-hosted AI agent systems, automation work, and troubleshooting.
- Maintain public GitHub projects featuring tested PowerShell automation, local-first Python/Streamlit/SQLite applications, sample data, documentation, run notes, and GitHub Actions validation. GitHub Portfolio: github.com/benthompsondev
- Strengthen Git, Linux, Docker, Python, Azure administration, CI/CD, and infrastructure automation skills through hands-on projects, testing and lab work.

AWARDS AND ADDITIONAL QUALIFICATIONS

- CompTIA A+ Certification
- Sustainability and Leadership Scholarship - 95.4 GPA at Mohawk College
- Startup I helped build won Niagara People's Choice Award in 2016 (Express Deliveries)
